DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in

37 CFR 1.17(e), was filed in this application after final rejection. Since this application is

eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e)

has been timely paid, the finality of the previous Office action has been withdrawn pursuant to

37 CFR 1.114. Applicant's submission filed on October 17, 2005 has been entered. Claims 1-3,

24-29, and 33-39 are presented for examination.

2. The text of those sections of Title 35, U.S. code not included in this office action can be

found in a prior office action.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 24-29, and 33-39 are rejected under 35 U.S.C. 102(b) as being

anticipated by Schiffleger (USPN 5,367,690).

5. As per claim 1, Schiffleger teaches a method comprising:

Page 2

requesting access to a resource for a first process (col. 2 lines 55-58; col. 5 lines 43-46; col. 6 line 67 - col. 7 line 6), the first process having a corresponding first semaphore (col. 4 lines 6-7; col. 5 lines 28-35; Fig. 3 element 18);

determining whether the resource is being accessed by a second process (col. 6 lines 25-31), the second process having a corresponding second semaphore (col. 4 lines 6-7; col. 5 lines 28-35; Fig. 3 element 18); and

denying the first process access to the resource if the resource is being accessed by the second process as indicated by a lock on the resource (col. 6 lines 31-34), wherein the lock is indicated at the second semaphore (col. 6 lines 34-37).

- 6. As per claim 2, Schiffleger teaches the method of claim 1, further comprising the first process having a corresponding first local priority and the second process having a corresponding second local priority (col. 2 lines 55-65; col. 6 line 67 col. 7 line 22).
- 7. As per claim 3, Schiffleger teaches the method of claim 1, further granting the first process access to the resource if the resource is not being accessed by the second process as indicated at the second semaphore (col. 7 lines 2-16).
- 8. As per claim 33, Schiffleger teaches the invention as claimed, including the method of claim 2, further comprising:

determining if access to the resource is simultaneously being requested by the second process (col. 7 lines 2-6); and

Application/Control Number: 10/045,414

Art Unit: 2195

granting access to the resource to one of the first process and the second process having a

Page 4

higher local priority of the first local priority and the second local priority (col. 7 lines 6-22).

9. As per claims 24-26 and 34, Schiffleger teaches the invention as claimed, including a

machine-readable medium, the machine-readable medium selected from the group consisting of

a floppy diskette, an optical disk, a Compact Disc-Read Only Memory, a magneto-optical disk, a

Read Only Memory, a Random Access Memory, an Erasable Programmable Read Only

Memory, an Electromagnetic Read Only Memory, a magnetic card, an optical card, and a flash

memory, the machine-readable medium having stored thereon data representing sets of

instructions which, when executed by a machine, cause the machine to perform the method of

claims 1-3 and 33, respectively (col. 1 lines 12-15, wherein the claimed machine-readable media

are well known to be part of computer systems, i.e. "a multiprocessor system").

10. As per claims 27-29 and 35, Schiffleger teaches the invention as claimed, including an

apparatus comprising:

a central processing unit having a processor to execute a plurality of processes including

a first process and a second process (col. 3 lines 23-35); and

the processor is further to perform the method of claims 1-3 and 33, respectively.

11. As per claims 36-38 and 39, Schiffleger teaches the invention as claimed, including a

system comprising:

1

Art Unit: 2195

a memory having a plurality of resources being accessed by a plurality of processes (col. 3 lines 23-35), and a plurality of semaphores associated with the plurality of processes (col. 4 lines 6-7; col. 5 lines 28-35; Fig. 3 element 18); and

a processor coupled with the memory, wherein the processor is capable of executing the plurality of processes (col. 3 lines 23-35), the processor is further to perform the method of claims 1-3 and 33, respectively.

Response to Arguments

12. Applicant's arguments with respect to claims 1-3, 24-29, and 33-39 have been considered but are most in view of the new grounds of rejection.

Conclusion

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Syed J. Ali whose telephone number is (571) 272-3769. The examiner can normally be reached on Mon-Fri 8-5:30, 2nd Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai T. An can be reached on (571) 272-3756. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
